Job Description

I'm a python fullstack developer who enjoys building reliable, scalable, and efficient systems using Python (Django, Flask). I love working with SQL and NoSQL databases, creating clean APIs, solving complex logic, and bringing ideas to life behind the scenes to ensure apps run smoothly and securely.

Qualification

KLN college of engineering   Year of passing - 2025
B.E,Electronics and Communications Engineering
7.57

V.H.N.Higher Secondary School
HSC
86.06

Tagore Vidyalayam Matriculation School
SSLC
80.4

Projects

Flexible Meta-Patch Antenna Array
A flexible 4×4 metasurface patch antenna operating at 2.5 GHz is designed using textile materials to enhance gain, bandwidth, and efficiency.

Brand Garage
Brand Garage is a car model project to add and manage car details. It shows brand, model, and specs neatly. Simple, smart, and user-friendly design.

Personal Traits

Proactive Planning

Adaptability

Time Optimization

Goal-Oriented
